1. HV input, fuse, bulk capacitor, bleeder, ground star point

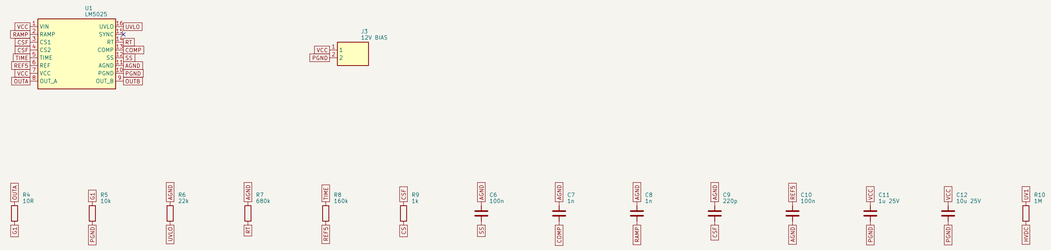

2. Power stage: transformer, main switch Q1, active clamp Q2 + C3, current sense

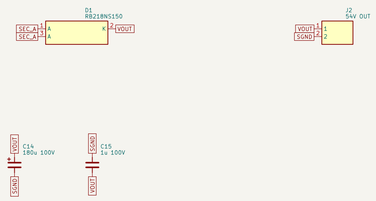

3. Isolated high-side (clamp) gate drive with bootstrap supply

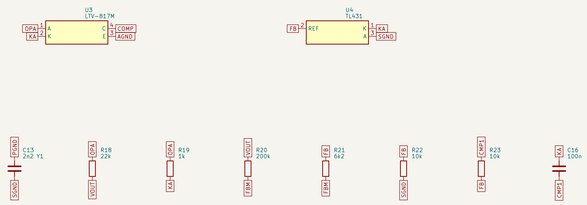

4. LM5025 active-clamp controller, UVLO / feed-forward dividers, bias input

5. Secondary rectifier and output filter

6. Isolated feedback: TL431 + optocoupler, Y capacitor

7. Usability: status LEDs (HV live, bias, output on) and probe test points
